➢ Introduction

➢Requirement Analysis

➢Tools and Technology

➢Scope

➢ Advantages & Disadvantages

➢ Research Methodology: Spiral Model

➢ Time Schedule

➢ Summary

➢ Future Plan

➢ Conclusion

Introduction

◈ Simple, reliable real-time chat system with modern features for easy and effective communication.

◈ Users will be able to send and receive messages instantly, ensuring smooth conversations without interruptions.

◈ Users can share images, videos, audio, and other files in real time, making communication more dynamic and fun.

◈ The platform will work seamlessly across devices, making it a convenient tool for everyone.

Requirement Analysis

Users
- Admin – delete the posts
- User – Chat, make friends, call, block, etc.

Modules
- Register
- Login
- Chat

Software Requirements
- Software's – Google Chrome, Microsoft Edge, Internet Explore, any other browsers

Tools and Technology

Front End:-

- HTML

- CSS

- Java Script

Back End:-
- PHP
- MySQL
- Java

Editors:-
- Visual Studio Code
- Canva

Scope

➢ Allows Real-Time Messaging

➢ Multimedia and File Sharing

➢ User Customization

➢ Performance and Scalability

➢ Maintenance and Updates

ADVANTAGES
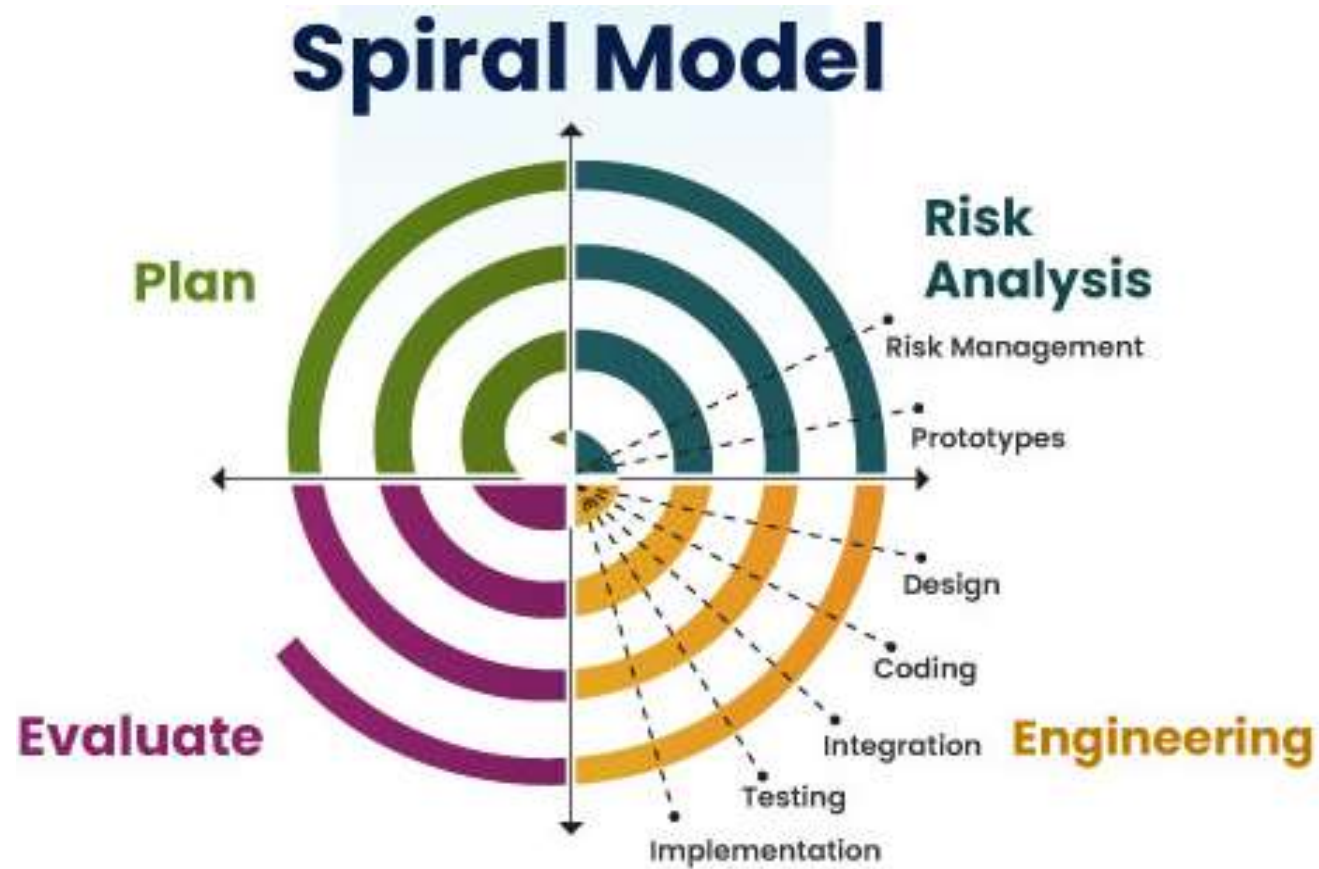

✓ Fast and Reliable Messaging

✓ Data Privacy and Security

✓ Cross-Platform Compatibility

✓ Customization and User-Friendly Features

✓ Cost Efficiency

DISADVANTAGES

▪ Miscommunication

▪ Training Needed

Research methodology:

(Time span: 10 November 2024 – 31 March 2025)

Future Plan:

✓ To make a dynamic software for all devices.

✓ To customize user interface more user-friendly.

Summary:

- "GuffGaff" is a simple, reliable real-time chat system with modern features.

- Users will send and receive messages instantly.

- The platform will work seamlessly across devices, making it a convenient tool for everyone.

- Users can easily sign up, log in securely, and manage their accounts.

- To keep everything safe, it will use secure passwords and offer options like two-factor authentication for extra protection.

- Users can share images, videos, audio, and other files in real time, making communication more dynamic and fun.

Conclusion:

- ✓ In conclusion, the "GuffGaff" website project is still under development which is real time chatting platform.

THANK YOU
